# My Background

## PhD Criminal Justice

- **Statistical Analysis**
- **Operations Research**
- **Predictive Modeling**
- **Policy Analysis**

## Examples of Prior Work

- **ALPRs and roadblocks in Buffalo** ([Wheeler et al., 2018](#))
- **Cost of crime hotspots** ([Wheeler & Reuter, 2021](#))
- **Impact of drive times on gun shot survival rates** ([Circo & Wheeler, 2021](#))

# What are LPRs?

## Cameras that take a pic of license plate

- **Check to see if plate is in a list of stolen vehicles & alert officers**
- **Cameras can be *fixed* locations or *mobile* (within a patrol car)**

Stephen Speranza for [The Washington Post](#)

## Reactive

- **Wait for car to pass by and alert**

## Direct Investigations

- **Can search of license plate, see where a hit occurred in the past (with lat/lon coordinates)**
- **Most PDs have ad-hoc policies about data retention (e.g. one month, six months)**

# Are LPRs effective?

## LPRs can maybe increase arrests

- **Some weak evidence they increase clearances** ([Koper & Lum, 2019](#))
- **Since they are cheap, can be good ROI even if only increase a few arrests** ([Ozer, 2016](#))

## Does surveillance tech deter crime?

- **LPRs probably not by much if at all** ([Lum et al., 2011](#); [Wheeler et al., 2018](#))
- **This is consistent with other tech (CCTV, Acoustic Gun Shot)**

## There are no rules for searching LPR databases

- **Do not need a warrant to do a search**
- **Mobile can effectively map your movements in vehicle in entire city**
- **Flock extra layer of exposure, since can share with neighboring PDs**

## What can we do about it?

- **State level policies on data retention & when can search**
- **Who watches the watchmen?**
